Highly skilled Frontend Engineer with 5 years of experience in building scalable and responsive web applications. Proficient in React.js, Next.js, WordPress, and modern CMS development. Experienced in delivering pixel-perfect UIs using HTML5, CSS3, Tailwind CSS, and Bootstrap. Adept in writing clean JavaScript/TypeScript code and integrating interactive experiences with jQuery and GSAP. Strong background in Git-based workflows and cross-functional team collaboration. Passionate about creating performant, accessible, and SEO-friendly websites.

KEY COMPETENCIES

HTML & CSS, Tailwind CSS, Bootstrap, JavaScript, TypeScript, jQuery, React.js, Next.js, WordPress, Shopify, Git, GSAP

WORK EXPERIENCE

Software Engineer   Feb 2023 - Present
Cubix Pvt Ltd

- Developed and maintained high-quality frontend website architecture using modern frameworks
- Designed responsive and user-friendly interfaces following industry best practices for usability and accessibility
- Worked on CMS projects built with Laravel, focusing on frontend UI development using Blade templates, HTML, and CSS
- Collaborated with UI/UX and graphic designers to implement pixel-perfect web application designs
- Worked on multiple client projects as well as in-house company products, ensuring scalable and maintainable codebases
- Built and optimized applications using technologies including Next.js, React.js and Vue.js
- Ensured cross-browser compatibility, performance optimization, and mobile responsiveness across all projects
- Participated in code reviews, agile ceremonies, and continuous integration/deployment (CI/CD) pipelines

Frontend & CMS Developer   May 2022 – Feb 2023
Golpik

- Developed responsive and interactive frontend interfaces using HTML5, CSS3, JavaScript, jQuery, and modern frameworks like React.js
- Customized and extended WordPress, Shopify, and plugins to meet diverse client requirements
- Built and managed CMS-based websites with a strong focus on performance, SEO, and mobile-friendly design
- Translated Figma/Adobe XD designs into pixel-perfect and cross-browser compatible web pages
- Integrated third-party APIs and plugins for dynamic content and forms
- Maintained and updated CMS platforms ensuring security, scalability, and content accuracy
- Worked closely with designers, backend developers, and digital marketing teams to deliver end-to-end web solutions

- Implemented animations and interactive UI effects using libraries like GSAP, AOS (Animate on Scroll), and others
- Implemented version control using Git and collaborated in Agile/Scrum development environments

Frontend & WordPress Developer   Jul 2020 – May 2022
Pluton Ltd

- Developed custom and responsive WordPress themes using HTML5, CSS3, JavaScript, and PHP
- Built user-friendly and SEO-optimized websites using Elementor, ACF (Advanced Custom Fields), and custom Gutenberg blocks
- Translated design mockups from Figma and Adobe XD into fully functional WordPress pages
- Customized and maintained existing themes and plugins to meet client-specific requirements
- Ensured cross-browser compatibility, performance optimization, and mobile responsiveness
- Implemented UI enhancements and interactive features using jQuery, JavaScript, and lightweight animations
- Collaborated with content teams and designers to ensure consistency across UI/UX
- Handled WordPress migrations, backup strategies, and site optimization for improved speed and performance
- Worked on both client-based and internal website projects with a focus on clean, maintainable code
